Project Name	ToyCraft Tales: Tableau's Vision into Toy Manufacturer Data
Maximum Marks	2 Marks

**Problem:**

**Toy manufacturers, retailers, and market analysts often struggle to:**

- Understand **product performance metrics** (like sales volume, category demand, and price effectiveness) across brands and toy lines.
- Identify **market demand gaps** across different regions and demographics.
- Compare **category popularity**, pricing, and seasonal sales trends to make strategic decisions.
- Lack a consolidated **visual overview** of toy sales, consumer behavior, and regional preferences in India and globally.

**Purpose:**

The **ToyCraft: Sales & Trend Analysis Project** addresses this by:

- **Visually analyzing industry datasets** from multiple sources using **Tableau dashboards**.
- Presenting **interactive visualizations** for top toy categories, seasonal sales trends, price comparisons, and demographic preferences..
- Helping users **identify high-performing products**, brands, and regional sales opportunities.
- Supporting **product teams, retailers, and strategists** in making data-driven decisions for manufacturing, inventory, and marketing strategies.
